Introduction

SMART GRADE is a complete Progressive Web Application (PWA) designed specifically for SIN GBHS FOUMBAN Form 5B Science students. It provides a comprehensive, offline-first solution for tracking academic performance across 14 subjects, 6 sequences, and 3 terms.

The application stores all data locally on the user's device, ensuring 100% offline functionality after the first installation. Students can add grades, view detailed statistics, and monitor their progress through interactive charts and reports.

SMART GRADE includes 23 achievement badges to motivate and reward consistent effort, along with a streak system that tracks daily usage. The app also features 20 customizable themes and 12 font families, allowing users to personalize their experience.

Beyond grade management, SMART GRADE offers a powerful AI Assistant for homework help and explanations, a multi-source search engine covering 15 platforms, a peer-to-peer chat system, and a homework manager for teachers and students. Data can be exported in PDF, CSV, HTML, or JSON formats, and transferred securely via QR codes.

Built with modern web technologies, SMART GRADE works seamlessly on Android, iOS, and desktop devices, offering a consistent and professional experience everywhere. Whether you're tracking your averages, setting goals, or generating reports, SMART GRADE makes academic management simple, fast, and secure.

1. Create an Account

Step by step guide to register

Welcome to SMART GRADE, the complete grade management system for SIN GBHS FOUMBAN Form 5B Science. From the Home page, tap the menu button in the top left corner, then select Register. First, enter your full name exactly as it appears on your school records. Next, select your class. You can choose between B1 and B2. Then, enter your unique student number between 1 and 70. Now, create a secure 4-digit PIN. This is like your password. You will also see an option to enable fingerprint login. Confirm your PIN by typing it again. Click the Create Account button. Congratulations! Your account is now created and you can login.

2. Login Methods

PIN or fingerprint

There are two ways to access your SMART GRADE account: using your PIN or your fingerprint. For the PIN method, go to the Login page. Select your name from the list and enter your 4-digit PIN. For the fingerprint method, first register your fingerprint in Settings. Then on the Login page, tap the fingerprint icon. Place your finger on the sensor and you will be automatically logged in. Fingerprint works on Android devices with Chrome or Edge browsers. If you have multiple accounts, you can switch easily from the login page.

3. Subjects and Coefficients

Configuring subjects per term

Go to the Settings page. You will see a section called Subjects by Term with three tabs: Term 1, Term 2, and Term 3. Select or deselect subjects by tapping on cards. You must select between 10 and 14 subjects per term. For each selected subject, you can adjust its coefficient from 1 to 10. The coefficient represents how important the subject is for your final average. Most subjects have a coefficient of 5. Click Save Subjects when done. The compensation system helps maintain your average if you remove a subject.

4. Add Your Grades

Entry and auto-save

Go to the Add Grade page. You will see three term tabs. Each term has two sequences. For each subject, enter your grades in the input fields. Grades must be between 0 and 20. You can use decimals like 14.5. As you enter grades, the Term Average updates automatically. When done, click Save All Grades. The app also auto-saves your grades every 30 seconds, so you never lose your work.

5. Dashboard Overview

Your main hub

The Dashboard is your main hub. You will see a motivation card with an inspirational quote that changes every time you visit. The Stats Grid shows your overall average, total grades, subjects count, and badges. The Goal Card lets you set a target average using a slider. The Term Averages section shows your average for each term. The Progress Chart is a line graph showing your average evolution over the year. Click on any term card to see detailed subject reports.

6. Reports and Statistics

Detailed analysis of your results

Go to Term 1, Term 2, or Term 3 to see detailed tables per term with all subjects and their averages. The Yearly page summarizes your entire school year with overall averages. The Statistics page shows your best subject, worst subject, and total grades. The Performance by Subject chart compares all your subject averages. The Grade Distribution chart shows how your grades are spread. You can also zoom in on the charts using the zoom plugin. Export your reports as CSV, HTML, or PDF from the Export page.

7. Achievements and Streaks

Badges and consistency tracking

Go to the Achievements page. There are two sections: Streak Badges and Achievement Badges. Streak badges reward daily usage with infinite cycles. Every 30 days, a new cycle begins with new badge names like Starter, Rising, Advanced, Master. Achievement badges include First Grade, Perfect Score, High Average, Scholar, Bookworm, Dedication, and more. There are 23 badges in total. Keep adding grades, uploading photos, and using the app daily to unlock all badges. The Photo Uploader badge unlocks when you add a profile photo.

8. Data Transfer

Local, cloud and QR code

Go to the Transfer page. You will see three methods: Local Transfer, Cloud Transfer, and QR Code. Local Transfer generates a 6-character code valid for 10 minutes. Cloud Transfer uses GitHub Gist to store your data temporarily. QR Code generates a scannable code with your data. On the second device, go to the Import tab, enter the code, or scan the QR code using the camera. The data will be imported immediately. All transfer codes expire after 10 minutes for security.

9. Themes, Fonts and Night Mode

Personalizing the interface

Tap the Theme button in the top right corner. A bottom sheet will show 20 color themes. Tap any theme to apply it instantly. Night mode activates automatically between 8 PM and 6 AM. You can also manually switch between dark and light mode. To change the font, scroll down in the Theme sheet to the Font Family section. You can choose between 12 different fonts including Inter, Roboto, Cinzel, Quicksand, and more. All changes are saved automatically. Try different combinations to find your favorite style.

10. Profile, Photo and Bio

Personalizing your account

Go to Profile from the menu. You will see a circular avatar area with a plus button. Tap the plus button to add a photo from your gallery. The system automatically resizes your photo to 500x500 pixels. You can zoom in on your photo by tapping on it. Below the avatar area, there is a bio section. Write something about yourself and click Save Profile. Adding a photo unlocks the Photo Uploader badge. You can also remove your photo at any time. Your profile photo appears in the header and on the welcome page.

11. AI Assistant

Homework help and content generation

Go to the AI Assistant page. You can choose between three AI models: Groq (ultra fast), Devstral (medium), and Codestral (code-focused). The AI can help you with homework, explain concepts, solve math problems, generate code in any language, and create diagrams. You can use LaTeX for math equations, markdown for formatting, and Mermaid for diagrams. All conversations are saved locally. You can create new conversations, delete old ones, and export conversations as JSON files. The AI knows the SMART GRADE system and can help you understand your grades.

12. Multi-Search Engine

15 sources queried at once

Go to the Search page. Enter a search term and the app will search 15 sources simultaneously. The sources are: DuckDuckGo for general search, Wikipedia for encyclopedia articles, Wiktionary for definitions, OpenLibrary for books, WikiMedia for images, Wikidata for knowledge, Google Books for books, Internet Archive for archived content, Jisho for Japanese dictionary, TheAudioDB for music, OMDb for movies, NewsAPI for news, YouTube for videos, Reddit for discussions, and GitHub for code repositories. Each source shows up to 8 results. You can filter results by source. Smart suggestions are generated based on your search results.

13. P2P Chat System

Chatting with classmates

Go to the Chat page. Each user has a unique 4-character code displayed at the top. To chat with a friend, enter their code in the search field and click Add. Conversations are saved locally and synced via JSONBin.io. The chat updates every 5 seconds automatically. Your online status is shown to others with a green dot. All messages are stored in the cloud and synced across devices. You can see your friends' online status in the conversations list. The chat works in real-time and is perfect for group study sessions.

14. Homework Manager

Tracking assignments

Go to the Homework page. All assignments are displayed with their subject, due date, and description. Teachers can add homework through the Admin Homework page. Homework can include file attachments like images, videos, PDFs, Word documents, and text files. The admin page requires a password for security. All homework data is stored and synced via GitHub Gist. You can filter homework by subject. Homework is organized by newest first. Each assignment shows the number of attached files.

15. Notebook, Backup and Sync

Personal notes and data protection

The Notebook page lets you write personal notes with colors, pins, and subject tags. Each note can be pinned to the top or marked as important. You can choose from 8 colors for each note. Notes are saved locally in your browser. Cloud Sync automatically backs up your data to JSONBin.io every hour. Auto-Save saves your grades every 30 seconds. You can also manually export and import JSON backups from the Export page. The Backup page lets you create manual backups and restore previous backups. Your data is always safe.

Quick Tips

- Your PIN is your password - keep it safe!
- Select different subjects per term in Settings.
- Grades save automatically when you click Save.
- 20 themes are available in the top right corner.
- 12 fonts are available in the Theme selector.
- Use QR Code to transfer data between devices.
- Enable fingerprint for faster login.
- Add a profile photo from your gallery.
- Use the AI Assistant for homework help.
- Multi-Search searches 15 sources at once.
- Chat with classmates using unique codes.

- Homework Manager shows all assignments.
- The Notebook lets you write notes with colors.
- Auto-Save saves your grades every 30 seconds.
